

Faculty Support

To advance sustainability and climate action at UBC.

Teaching

SUSTAINABILITY EDUCATION GRANTS • Up to \$20,000 over two years for faculty members to create new courses and programs to advance and diversify sustainability education.

SUSTAINABILITY FELLOWSHIPS • Collaborate with other faculty members who are designing new sustainability courses and programs through a Sustainability Education Grant.

CLIMATE EDUCATION GRANTS • Up to \$5,000 for faculty members to incorporate climate change content into existing courses.

CLIMATE TEACHING CONNECTOR • Integrate climate content into undergraduate classes by connecting with climate change and climate justice experts.

Research

CAMPUS AS A LIVING LAB • UBC's Campus as a Living Lab (CLL) initiative provides a collaborative framework and up to \$50,000 in seed funding for faculty and staff to test new ideas on campus.

FIND A RESEARCHER • Let the broader UBC community know about the sustainability and climate research you are carrying out by making sure you are listed.

RESEARCH GROUPS • If you are part of a sustainability-related research group on campus, you can share your work and meet new collaborators.

SEEDS SUSTAINABILITY PROGRAM • Explore applied research partnerships between students, faculty, staff and community partners to advance sustainability.

Student Experience

SUSTAINABILITY SCHOLARS • Encourage graduate students to join this innovative paid internship program that matches them with on- and off-campus sustainability partners to work on applied research projects that advance sustainability across the region.

CATALYST • Let students know about Catalyst, an accreditation program that acknowledges the work and volunteer time contributed by students in all disciplines to advance sustainability and climate action.
